
Supplementary Figure 4. Partial correlation coefficients ($p<0.05$) are shown in the figure and Partial correlation coefficients ($p>0.05$) are marked as X. Positive correlations are shown in blue color and negative correlations in red color. Color intensity is proportional to the partial correlation coefficients. Partial correlation plot between Childhood Trauma Questionnaire (CTQ) scores and Borderline Personality Disorder Scale (PAI-BOR) scores in all female patients (N=330).
