

**Supplementary Table 1.** Demographic and clinical characteristics of the study subjects (N=558)

Variable	Delayed (N=25)	As scheduled (N=533)	p
Male sex	9 (36.0)	272 (51.0)	0.142
Age (yr)	53.7±15.5	59.9±11.5	0.010
Residence, Ulsan	20 (80.0)	466 (87.4)	0.352
Cohabitants, presence	23 (92.0)	455 (85.5)	0.558
Education level, graduate degree	8 (32.0)	113 (21.2)	0.200
Religion, presence	16 (64.0)	347 (65.1)	0.910
Occupation, presence	10 (40.0)	154 (28.9)	0.233
Current alcohol use, presence	6 (24.0)	43 (8.1)	0.016
Current tobacco use, presence	0 (0.0)	26 (4.9)	0.622
Psychiatric illness, presence	7 (28.0)	40 (7.5)	0.003
Cancer types			0.181
Solid tumor	15 (60.0)	264 (49.5)	
Leukemia	5 (20.0)	200 (37.5)	
Others	5 (20.0)	69 (12.9)	
Cancer stages			0.520
Stages I, II, III	10 (40.0)	269 (50.5)	
Stage IV	10 (40.0)	160 (30.0)	
Unknown or non-TNM staging cancers	5 (20.0)	104 (19.5)	
Current cancer treatment, presence	13 (52.0)	389 (73.0)	0.022
Complete remission, yes	7 (28.0)	99 (18.6)	0.293
Questionnaires			
Stress and Anxiety to Viral Epidemic-6	15.4±3.6	13.6±4.7	0.060
Patient Health Questionnaire-9	7.2±6.3	3.5±4.4	0.001
Fear of Progression Questionnaire-short form	39.2±8.5	30.6±10.6	<0.001
CERQ-18 (adaptive)	29.5±5.5	27.3±8.0	0.105
CERQ-18 (maladaptive)	19.6±5.8	15.3±5.2	<0.001

Values are presented as mean±standard deviation or number (%). CERQ-18, Cognitive Emotion Regulation Questionnaire-18
